TRECCERT

NIS2 Practitioner
Training Course

TRECCERT NIS2 Practitioner is an intermediate-level course designed to provide professionals with a thorough understanding of the NIS2 Directive requirements. The course covers the regulatory framework, risk management, security measures, incident reporting, and escalation procedures needed to support NIS2 compliance initiatives within organizations.

TARGET AUDIENCE

This course is developed for professionals with a foundational background in IT or cybersecurity who are responsible for contributing to NIS2 compliance, including:

· IT Administrators and Security Analysts
· Cybersecurity and Compliance Professionals
· Risk Management Officers
· IT and Network Managers
· Compliance Professionals and DPOs
